Tip ID # 103037 Date/Time Received: 02/26/2013 - 11:39:00 PM Submitter: 	Alleged Violator: Erie coke 925 E Bay Dr Erie , Pennsylvania 16507 (Region 3) Date of Violation: 02/26/2013 Violation still occurring?: no Notified state DEP/DEQ?: yes	Intent: Intentional Type: Release Media: Land Water Air Entity: Company	Directions to site: I live in the same bay area as Erie Coke and sometimes we can actually see the smoke. Please look at this video at what we are dealing with. http://www.youtube.com/watch?v=4dXsS75kqOg
Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-103037-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
We have had continuous problems with the air quality because of Erie coke, we have strong odor of coal burning and we have black soot on our windows, everytime we smell these odors outside I get sinus issues and become ill, as in vomiting extreme headaches, etc.. I have contacted the local PA DEP and out of several attempts that I've contacted them, they left me one voicemail to contact them within hours that are not convenient for me and provided no follow up detail, I am not happy with the fact that I have to keep chasing them to fight for information about this issue. I know they fined them but I'm not sure they have done anything else to stop them from polluting, but I would like to know what they are doing to enforce their prosecution and to assue violations stop happening. I feel as though if they were following through with their inspections I would not be having these issues that I keep having. my neighbors suffer from the same issues, but they all seem to think that this is normal but I know this is not. I would really like someone to investigate and get back to me about their findings. I have been debating moving just because of this issue, because I dont see why I should have to because someone in a government department feels they have done enough, but the problem still exists and is worse. I just hope you can help me out by keeping me informed about what is happening with this case in a format convenient to me(email).

Tip/Complaint:

Hello, In Columbia Virginia, there is raw sewage being put into the James River. This is something that I have heard about from other people as well as smelled when passing by some run down houses on Route 6. These houses are within the corporate limits of Columbia and on the south side of Route 6/St James St. and west of Columbia Road. Please investigate this situation as this untreated sewage is a hazard to the drinking water of Richmond, which is downstream.

Tip/Complaint: Mr. Kerry Blum had hired me to do work for him, cleaning out the basement of a property he had purchased, upon cleaning out the property i had noticed noticed asbestos all along the ground of the floor and hanging from pipes of the property. I informed Mr. Blum about the asbestos, hes response to me was to sprinkle water on it and dispose of it either in the dumpster or in a room in the basement which he intended to seal. I			

6-2

refused to do such for my own safety and that of others. i was then replace to do the job by people who eventually had also refused to do the work as well. Mr Blum, then solicited a man off the street who i know to be mentally impaired to do the work illegally removing the asbestos, i do not have pictures of the Mt Carmel property in question but i do feel if investigated a plethora of illegal activities and or code violations will be found. i would like to remain anonymous if possible,

Tip/Complaint: The water company work on this street for several months, tearing up the sidewalks, laying pipes along the curbs and exposed pipes in the street. Since that time my water is extremely cloudy with floating particles and smells heavily of bleach, which I saw on their trucks when they were working. I am afraid to drink or cook with this water. I feel very strongly that this water does not comply with EPA regulations and this it is unsafe to consume.

Tip ID # 102921 Date/Time Received: 02/22/2013 - 1:12:00 PM Submitter: Ex 6 	Alleged Violator: Gray's Transport/subcontractor for Stella May Contracting 2855 Lodge Farm Rd Baltimore , Maryland 21219 (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Release Media: Air Entity: Company	Directions to site: The N. Charles Street two year reconstruction project y is on N. Charles Street from 25th Street to University Parkway (approx. 1 mile in length), and involves sewer, water, gas, street drainage replacements, along with final repaving of the street and sidewalks. Hospital tests showed no bacterial causes.
Subject: Referred to Region - Maryland Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102921-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:

I suspect that Grays Transport is burning/using contaminated diesel fuel in their dump trucks. I have asthma, and therefore I am the canary in the coal mine. I have lived in the city of Baltimore for over 15 years, daily exposed to all sorts of diesel exhaust, but since these trucks have been working on the Charles Street reconstruction I have had 3 severe attacks, including one where I almost died on the street, saved by medics with epi pen and hospitalized at Union Memorial Hospital. While in the Hospital, I overheard staff say that they had over 7 admits for Asthma (sounds like a spike to me). I have never had attacks that required any life saving action other than my inhaler in the previous 15 years. Since that experience, I have been keenly aware of everything going on in my environment, and my breathing. Over the last week, when walking along Charles Street, I have observed that when the exhaust from Grays Dumptrucks is blown in my direction, apart from the minor tensing of my bronchials, within 5 minutes the secretions and tightening of my chest continued to exacerbate. I then remembered that on the day that I collapsed on the street unable to breath, and pedestrians called 911, that approximately 20 minutes before, I was running and deeply breathed in fumes from the construction trucks working on the Charles Street project. Yesterday, when I took the time to write down the names of the construction companies involved, and did an internet search for their address to notify you, I discovered that Grays Transport advertises that they are also in the business of environmental waste hauling....hmmmmmm! I hope you understand why I suspect that they may be the source of the asthmatic/respiratory problems spike in Baltimore.

Tip/Complaint:
It's a Marcellus waste facility only the waste may sit in building for few weeks at a time. And there is a small creek or drainage ditch behind it. And on numerous ocssions it has flowed out of building and into the ditch. Also there is a storm drain in the center of the facility and anything that gets spilled in the yard truck oil, diesel fuel, drill mud, flow back water, it goes right to the city's treatment plant. I've also been reading about the radioactivity in these cuttings and they have these guys down here working in this radioactive mud or water and they have no idea of what there subjecting themselves to. I'd like to stay anonymous but I think it would be in the best interest of our environment to have someone look into this.

Tip/Complaint:

Hello my name is [REDACTED] (representing the Good People of Madison Avenue). I'm writing this because I have some concerns and issues that the Mayor of Point Pleasant, WV, City Council of Point Pleasant, WV and the Engineer of the North Point Pleasant drainage Project will either refuse to answer or just sit and look at me as if I'm speaking a foreign language so I going to ask them to you. The first issue is that the city of Point Pleasant wants to drain the water from the streets right through the good people of Madison Avenue back yard in an open ditch(they are calling it a grassy water way) . This water is contaminated from the road, oil from the blacktop, tire wear and oil from cars that has leaked to say the least. This storm water as they call it is no more than run off water from the streets and people's eve spouts not storm water. They want to run this water back to a creek that leads to the river. They are planning on doing this without filtering the water. Would this make the river contaminated? What about the people's health that this drain water is going through their yard or what about the people who garden on this street? The wildlife will be affected also. The standing water will cause mosquitoes to be a bigger problem and we all know what problems that mosquitoes can bring. The Mayor was asked to put some type of pipes in there and the city attorney(R F Stien) spoke up and said that it would cost 47,000 dollars more to do this and the people of this area are not worthy enough to have this done. Later in the meeting the Mayor was asked how about repaving 27th street and he said that don't worry that they would use the funding for the North Point Pleasant Drainage Project to pave this. This makes the good people of Madison Avenue think that the city does not care about the people of Madison Avenue (plus most people of Madison Avenue are elderly or disabled). Isn't this fraud or miss use of funds? I bring this up because I know that the DEP is financing the project and you should know what the money is being spent on. Another thing that you might find shocking is that the City of Point Pleasant over a 6-10 year span has had the money to do this project four times and none of these times has the money been spent on anything to do with a drainage project!! I have been watching Huntington, WV and DEP are requiring a pond with a filtering pump house before they can do this. Huntington is having trouble finding a place for the pond and pump house. The next issue that I have is the way the City obtains right-of-ways. They increased the area in which was not affected the ditch to get there numbers up. They also stood outside of churches and gave the people a dollar to sign where it affected them or not. If that did not work than they had Dave Tabett to strong arm people into signing buy telling them that they would be fined or taken to jail. This was done mostly to the elderly to get them to sign. Is this legal or ethical? This property is very usable and not condemnable as the city would like you to believe, I garden on it, one of the people of Madison Avenue has his grandchildren a pool to enjoy in the summertime and host many picnics on his property. Another entertains his grandchildren with baseball games and many summer time fun activities. The property were they want to put this ditch is well maintained and clean. The ditch would put an end to this and make the ground wet and soggy all the time. I think the way to fix this problem is to have some type of pipe underground to drain the water and have the pond and pump house to filter the water back to the river as it needs to be. Thank You [REDACTED]

Tip/Complaint: Kimberly Cook recently purchased this property. Her intentions are to BURN the property and replace it with a double-wide trailer. The building was built probably in the 1950's. Citizens of the county are concerned that asbestos and lead paint will be released in the air and water when this property is burned. This property is only yards from the local high school and adjoins a creek. There are concerns of water pollution and fish and wildlife danger. The owner is planning to bulldoze the area and burn the building on friday 2/22/2013. Citizens are not certain this building contains asbestos and lead paint but if in the event it does, many houses, children, wildlife, and citizens will be exposed. There is an elderly couple living next door, one of which, is in poor health. The building is approximately 5,000 square feet and would cause a significant pollution problem.

Tip/Complaint: Every afternoon numerous commuter buses park on the 1700 block of C St. NW and the area of 18th St. between C St. and D St., along the perimeter of our building, in clearly marked "No Idling" areas. They sit there for a half hour or more at a time running their engines. The deisel exhaust is so thick during their frequent engine reving that people have become ill in offices with windows facing the street. The buses are from all of the major bus services, including Dillons, Martz, Coach USA, and Keller. The DC Police have refered us to the EPA for complaints about violations of the no idling law.

Tip/Complaint:

Carter Lee Loar and his businesses Paramount Properties, LLC and Paramount Enterprises, Inc, as well as other companies that he deals with are bringing into our residential neighborhood construction and other waste materials and burning it on his residential property in the form of a bon fire. This does not constitute "backyard burning" and appears to be in violation of all federal and local laws. This information has been submitted to the zoning administrator of Culpeper County VA who has claimed it is not his jurisdiction to take care of, when clearly the Code of Culpeper County states it is. This burning has been happening for years, but only in the last year has it become more frequent and the waste that is burning more toxic. I can provide pictures of debris piles from various dates. He also burns less than 100 feet from brush/and tree lines.

I have witnessed my neighboring auto shop (Complete Automotive) burning substances emitting off thick black smoke for months. I had a baby almost 2 weeks ago and dealt with this for multiple months and noticed that the smell is coming into my house. I have called the local nonemergent police line on 2/15/13, code enforcement also on that same day. I was told to call 911 for them to "catch" this in the act. I called 911 on 2/16 in the late evening and the officer went to the business, knocked and no answer. Report was done according to the officer. I called 2/18/13 around 4 pm and they haven't arrived as of yet (5pm)..... I am concerned for my daughter more than anything and frustrated with bothering the emergency lines with this but I am getting nowhere because by the time the officers arrive, the smoke is "normal". I don't mean to be a bother or snitch but it's getting more noxious and my whole house smells for hours and most importantly- my newborn daughter inhaling potential carcinogens. Thank you for your assistance.</p>

Tip/Complaint: There is a dumpster that has been placed at the end of Richard Allen Street, in the Cedar Haven community of Aquasco, MD in Prince George's County. At the end of Richard Allen St are the banks of the Patuxent River, which is a part of the Chesapeake Bay Watershed. The dumpster that has been placed there is only there from Tuesday to Thursday, but trash and other items such as sofas, car parts, motor oils, glass bottles, aluminum cans and other items and debris are left and finding their way onto the banks and into the water of the river. There appears to be no one in the community to report this information to, but I truly feel that the trash being dumped less than 25 feet from the Patuxent River is some sort of environmental violation, and I am looking for any and all assistance to correct this situation. Thank you [REDACTED] <i>Ex 6</i>

Tip/Complaint: My name is  I just returned from walking my dogs and met one of my neighbors with their dog we noticed that Gedco has put markers in the ground at the North end of this lot. One of the markers says corner of building. .which means they have all intentions to start this project soon. I have given you everything I know about this place and Gedco now please do everything, in your power, to permanently stop Gedco from constructing these unwanted condominiums here. Thank you for your understanding in this extremely important matter. Hopefully you will prevent this from happening, because I do not wish to see these unwanted condominiums here nor do my neighbors all we want to see is the beautiful green grass here so we can play with our dogs here.

Tip ID # 102645 Date/Time Received: 02/14/2013 - 2:52:00 PM Submitter: 	Alleged Violator: MarkWest Hickory rail station near Hornhen Road Hickory , Pennsylvania 15340 (Region 3) Date of Violation: 02/13/2013 Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Release Media: Air Entity: Company	Directions to site: Farmers address is 241 Hornhen Road in Hickory, Pennsylvania. Mark West railyard and 6 or 7 rail tracks are also in Hickory nearby the farmer's property.
Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102645-3711-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
The MarkWest company operates a railyard for loading rail cars with gas & liquids in Hickory, Washington County, Pennsylvania. A nearby resident to this facility who owns a farm close to there, noticed rail cars burning on Wednesday, Feb. 13th. It was not an accident, staff had the facility told the nearby resident that the rail cars were on fire in some type of cleaning operation. Possibly the situation is that Mark West staff sometimes light the cars on fire to clean out remnant gas or liquids. Resident wasn't certain about why this is done, but it smelled bad, and also appeared to be dangerous. Residents call was received by Garth Connor, of OECEJ in EPA's Philadelphia office.

Tip/Complaint:
 In 2011, the Environmental Protection Agency was poised to cite evidence of cancer risks in hexavalent chromium, a chemical found in tap water. Yet a special EPA panel urged the agency to delay action, citing research by the American Chemistry Council, a powerful industry lobby. How influential was the ACC in the EPA's decision? The Center for Public Integrity has this special report.

had a response to any yet. I also sent a request to the EPA for follow up; no response either. I have now trouble with my temperature controller of my heating system and it is winter where I live. Temperatures are close to freezing. I have not been able to get the heater to run. I called for assistance and the service provider Gillice visited and read the notes on the door and reported that they would not be able to provide service because of the sign on the door of a concerned safety issue. He then closed the service request. Now I am not able to get service and I am to take responsibility for someone entering my house in the presence of this suspected hazard. The possibility is there that my water lines will freeze and lead to water damage. My son, a Marine and deployed, has visited twice previously and so has my daughter and each time I believe that there were problems. On the first visit, he (my daughter is not affected) started to rout (jerky movements with legs or body) as I do continuously myself, indicating the presence of HFV(?). I was at the UPMC St. Margaret's hospital on [REDACTED] and when I walked in room 21 it (symptoms) stopped during a certain period of time and then started up sequenced (OCD testing protocol?) On the second visit my son was actually visibly impacted negatively, but then I am not an expert or doctor. I would like you take some type of action here, astublief (mark). I hear HFV as per LEGAL HFVROB tmi provided by

Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102597-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Lead Closed Lat: Lon: Category:
Tip/Complaint: This company's old diesel locomotive acts as a tug in the small railyard in West Lebanon. It is constantly producing heavy black to dark brown smoke that envelopes the entire downtown West Lebanon area. It appears that much of the smoke is dur tothefact that the locomotive is not running properly or is just simply old. The fire department routinley gets calls for smoke in the area from concerend citizens. The entire area, which consists of residential neighborhoods, is saturated with the stench of incomplete diesel combustion. I have recorded on video this locomotive producing heavy amounts of pollution.

Tip ID # 102593 Date/Time Received: 02/13/2013 - 8:11:00 AM Submitter:  <i>Ex.6</i>	Alleged Violator: Gedco The greenhouse at stadium place Baltimore Maryland , Maryland 21218 (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Release Media: Water Air Entity: Unknown	Directions to site: The information you need to permanently shutdown and permanently close both Stadium place and Gecco is in the preceding message walking or driving instructions I have no idea where you are located or where you are coming from. This place, Stadium place is on the grounds of the old Baltimore Memorial Stadium. This lot is bordered by these streets. North South bound streets of Ednor Road an Ellerslie Avenue East West bound streets are East 36Street and 33rd.Street. These are the boundaries of the old Baltimore Memorial Stadium an it lot. This all the basic information I can give you because I have no idea where you are located or where you are coming from. Now please under no circumstances waste too much time Gedco already has a trailer on the lot it will be their business for selling these unwanted condominiums they want to build here. Their is one very strange thing there are polls in the ground an wire hung but that wire which is to be the power for the trailer in not hooked either transformer nor are meters on line now are wires hooked up to the trailer. This is just some information I thought you must have. Thank you. Now do us the favor and close and shut this place and Gedco down permanently.
Subject: Referred to Region - Maryland Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102593-3800-CV Ref. Lead Number: Case Number:	Message Referred To: State Credible Threat: Priority Term: Language:	Lead Status: Lead Closed Lat: Lon: Category:

Tip/Complaint:
The problem comes from both the poor building materials used in the construction used in the building of all four buildings. That building material is particle board an in combination with the fast and cheap mortar used in the construction process the process was fast not allowing the cheap bricks to thoroughly set then dry. When he weather is wet outside like rain or snow the seams of the laid bricks leak thus the interior shell is particle board

0.42 [REDACTED]

gets wet when it gets wet it emits formaldehyde fumes that is part one of the deadly toxic mix these four buildings have. The next part of the deadly toxic mix is Legionaries disease in the water which comes from the well Gedco had drilled in the beginning when this development was started. Last year I talked to a house keeper who told me that people that live here are either dying or friends and relatives are coming to take these people out of this place because they are saying that this place is not safe for anyone to live here. That same house keeper told me that this place is becoming a real ghost town. When these building were under construction I watched as hundreds of Hispanics built these four buildings from the ground up. The first building took two months because, Gedco demanded this first building to be built in a very short period of time because they didn't have enough money to fully purchase the property they were building on so after the first building was complete,ready or not,it was open for immediate occupancy. The second building took longer because, ICE came and removed everyone on site thus delaying the construction and finishing of building two. Two weeks later the process began with a new group of Hispanics the same number using the. very same cheap building materials. After the frame work was completed the materials used for the interior shell arrived,this is particle board it is thin an when it gets wet,an it will,because when the exterior walls are put in place with the cheapest bricks an the poorest grade of mortar an by not allowing the mortar to totally set then dry this will allow water to enter the seams into the interior shell which is particle board which when wet emits formaldehyde fumes. This in conjunction with the contaminated water that has Legionaries disease from their private water well. When you investigate this and thoroughly inspected this Gedco will do everything to mislead you even stonewall you to make you think they have city water, but there has been outbreaks of Legionaries disease and that can only happen in contaminated water. What must be done now is to immediately permanently shut down Gedco so they won't be able to build their unwanted condominiums here next permanently shut down and permanently close stadium place so Gedco won't be able to profit from this place ever again. Now if you want to save the latest building,the new hospice just completed in 2012 all licenses and permits must be permanently revoked so Gedco won't be able to profit from this place ever again. Now after this has been done all residents must be moved out to safer locations, have then contact friends,neighbors and relatives tell them they must be out now because this place will be demolished real soon or the very next week but no later. This process must be started almost immediately, because Gedco intends to build these unwanted condominiums here sometime in the next two months an we in Ednor Gardens do not want these unwanted condominiums here ever. Please get this process started immediately so we never see these unwanted condominiums we hope this project never sees the light of day the only thing we want to see on this lot is beautiful green grass so me and my neighbors can bring our dogs here and play with them. Every time a developer sees a large plot of open ground with grass on it the first thing they want to do is build something on it regardless of what the neighbors want. Please make this happen now so these unwanted condominiums never see the light of day. Thank you for your understanding in this extremely important matter. My name is [REDACTED] live here .

Notes: Hi Karen, This retirement complex is supplied water from Baltimore's water system. There are no wells supplying drinking water to this complex and we don't know why [REDACTED] thinks there are. In 2009, they did have cases of Legionaries disease, but since then have made modification to their distribution system to avoid dead ends and increased sampling. We are not aware of any cases since then. : Re: Fwd: Unhealthy living conditions /contaminated water in Stadium place Dear [REDACTED] Thank you for your inquiry. We appreciate your concerns. To put your mind at ease, we assure you that all approved potable water service connections within the City limits, including Stadium Place, are provided water from the Baltimore City municipal water system and not from groundwater wells. The City's water comes from reservoirs and is treated and monitored frequently for numerous contaminants. We are aware that there was an outbreak of Legionnaire*s disease in some Stadium Place buildings in 2009, however, measures have been taken since then to reduce the risk of Legionnaire*s disease including increased monitoring and modification of the distribution system. The Maryland Department of the

Tip/Complaint:
I recently read an article regarding Hyundai,Kia accused of exaggerating gas mileage. I own a 2009 Kia Sportage purchased new. I have used 36000 miles on my car. I receive between 8.5 and 9 miles to a gallon of gas in the suburbs. This has been an issue since I purchased the car. I have had my mechanic check my car several times too see if there was a problem because of the gas mileage. His words were you must have purchased a lemon. I want this reported even if I get nothing in return. I am a single mother and have been disabled since 2008. In years previous I had a long commute and would purchase a new car every three years. Unfortunately because of my health I will have to drive this car until it is in the ground. I would not mind if the car was comfortable to drive and it was something to brag about. I purchased it because of the so called low gas mileage and its rating were high at that time. I am very disappointed, I spend entirely too much money on gas and now I know why. Thank you

Tip/Complaint:
When I moved into my apartment in October of 2011 I was not provided with any pamphlet on lead safety and I was not informed as to if the landlord had information as to knowledge or no knowledge of lead as he did not fill out that part of our lease. The only thing my lease contains is the paragraph about homes built before 1978. I have tested several areas of my home which have tested positive for lead including window frames and the insides of my kitchen cabinets. I have children in the home including one child under the age of six. You have previously investigated this landlord and he had to pay fines and repairs in other properties. The docket number from the older cases is Docket No. TSCA-03-2008-0433 if this is helpful.

Tip/Complaint: Landlord has 2 unit apartment building that was built in 1892, He Has stated in writing that he does not feel that his building has any lead concerns because he has lived in this house and has no personal health issues related to lead, therefore no lead exists. He also stated in writing that he has not had any testing done. My one daughter rented the bottom apartment and my other daughter lived in the upstairs apart and there were 2 children born and raised for 3 years in this house. Neither were given a 1080 disclosure. This building has 2 legal addresses known as 560 east 14th/ 1320 ash street. It is located on the southwest corner of 14th and ash street. Mr Lawrence, owner of this apartment building resides at 26264 Eureka Rd, Edinboro, pa 16412 and phone number is  According to the government assessment website, Mr. Lawrence has been legal owner of property as of 3/5/1996 and has been renting the 2 units as of that date without informing tenants of any possible lead content in building/or required 1080 disclaimer. If I can be of any further assistance please feel free to notify me by phone or letter. I thank you for your time and consideration in this issue and am hopeful that you can help in this matter. <i>Ex. 6</i>

Tip/Complaint:
This has been on going for years Thomas Donaldson sr. has been realeasing recovered freon instead of paying to get rid of it he takes the bottles of recoverd R410A,R22,R134A Behind his shop on location at 267 Blackbarren rd. peachbottom pa.17563 And opens the containers letting the freon into the atmosphere its been going on for as long as i can remember dated back to year 2002. I used to work for him and he used to make me dispence of the recovered freon between years [REDACTED] in the same matter. [REDACTED] also used to work there too about a week ago 2/7/13 [REDACTED] eye witnessed him dump a hole can of R22 and 410a. I also have my type 1 and type 2 EPA lincence I also know that there has never been any log to keep track of dispenced and recovered refridgerent Which I beleive is required by law. I know for a fack he has never properly disposed any type of freon ever. I will garantee it can be proved I think its totally wrong for him to save a couple dollars by doing this to the O Zone I think he needs stopped asap. And trust me its not like he doesnt have the money to get rid of the refrigerant he is tight with a dollar and i really feel he should pay for the damage he has caused. the company name is Donaldsons Alternative Energy solutions. If any questions please contact me [REDACTED]

Subject: Regional Tip and/or Complaint - Pennsylvania Recipient: Regional Tip and/or Complaint morris.makeba@epa.gov,connor.garth@epa.gov	HQ Lead Number: FY13-102454-3708-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Lead Closed Lat: Lon: Category:

Tip/Complaint:
We are a facility that produces coatings for the inside of food and beverage cans. There was a leak in our piping system near building #16. Product spewed out of the pipe onto the ground/grass. The pipe's insulation was saturated, as well as, the grass below the pipe rack. The leaking line was blown with nitrogen and dismantled. For the sake of convenience and time, all of the saturated pipe insulation was thrown into an open hopper to later be put into hazardous waste drums. I believe they just dumped it into our garbage compactor and did not dispose of it properly. I asked what they were going to do about all of the product that escaped into the grass and dirt, I received a vague answer. The saturated insulation was dumped as regular garbage. (I can't prove this). A small amount of grass was dug up. There are 7 drums of unlabeled contaminated dirt by the dike on "the hill". There is also an open drum on the hill near green un-neutralized acrylonitrile drums that contains contaminated dirt. No soil samples have been taken that I know of to ascertain if they got all of the contaminated soil. I am not sure if it was reported to proper authorities or not. There are also several more violations throughout the plant. There is an out-of-date hazardous waste drum in the north section of building #16 near tank 4006. Inside building 20A they keep several drums of hazardous waste in the satellite accumulation area. I also believe that there are various amounts of hazardous waste in the north, as well as, the south tank truck loading satellite areas that are out dated and/or full. Various amounts of "spent MEK" and "spent butyl cellosolve" are sprinkled throughout our plant in areas other than our hazardous waste storage area. The continuous, blatant disregard for EPA regulations needs investigated as soon as possible.

Tip/Complaint:
New house was built @ above address, during construction the builder tapped underground spring (this location is on water supplied by the city of Baltimore) The county inspector signed off on the permit without checking. Neighbors have pictures during construction. For the past 2/3 yrs. there is a constant flow (small river) spring water being drained in the sewer in front of my property from the sump pump of other house. This is causing damage to the side walks and my driveway and causes excessive waste in front of my house, plus wasting all this fresh water. During this water freezes on my driveway.

Tip/Complaint: I keep seeing a liquid hauling truck dumping something into the Antietam Creek. I don't know if it's legal or not, but I've never seen anyone dump into the water before. If it's plain water, I don't know why they would dump where they do. The even leave their make shift drainage hose along the road and water. Plus, their company info is always partially concealed.

Tip/Complaint:
[REDACTED] Brickman is a landscaping company that handles various types of pesticides and fertilizers. The yard where the trucks and trailers are kept are subject to flooding very easily, which leads to various toxins running off into the stream directly behind the yard. On a few occasions, I commented on spilled granular pesticides being swept onto the lot while it was raining and was told it was ok and not to worry about it. One of these pesticides is Snapshot, very toxic to all wildlife including aquatic. I always felt that this was very wrong and think something needs to be done. [REDACTED]

Tip/Complaint:
They release some kind of thick white fog vapor that irritates peoples skin and respiratory functions. As far as I know they release it every Wednesday, Thursday, and Friday. I work for Goodwill as donation center attendant at the Hanover County Solid Waste Refuse center in Elmont, VA which is just downwind from where they release this "fog". I believe they are doing "hot dip galvanization"

Tip/Complaint: The house was supposed to be winterized, in the water closets (toilets) and shower / bath drains there is Ethylene glycol based antifreeze (green). This residence is attached to a septic tank, which would disperse the toxic Ethylene glycol antifreeze into the ground. This particular area has a very high water table since it is located almost on the Chesapeake Bay in Virginia. I have made several attempts to have a reality company resolve the issue but as far as I know to date it is still not yet addressed. I also have photographs of the property as well as the water closets (toilets) and the substance inside of them, and the drainage pipes for the showers / baths, kitchen and lavatories.

Tip/Complaint: On 02/14/2012, Woody's responded to my address to fix a heat pump coil in the house I was buying. They added freon at this visit after changing a txv valve and never checking the coil for leaks. On 06/01/2012, the owner responded to the address as the system wasn't cooling. He added more freon in this visit and noted that he suspected the indoor coil was leaking on the paperwork provided. I have the documentation from Woody's for both visits stating they added freon multiple times. This was not video recorded, there are photographs of the coil and the coil is being retained as evidence for a civil suit (court date 4/11/13) filed against the previous owners on a seperate but related issue.

Tip/Complaint:
Jody Hardison is running an auto body shop on 304 Bunker Lane Ringgold VA 24586. He is spraying chemicals in the air that burn your eyes when you step outside, he is dumping anti-freeze and other chemicals from the body shop on the property that the land slopes and runs onto my property, when it rains I am getting these chemical run offs. He has tires sitting everywhere outside, batteries and other things from the cars that he is working on. The paint smell is very strong and the sand blasting coming out of the shop puts a white cloud in the air. He goes to the County Dump in Ringgold and throws used batteries, oil and other items in the containers that should not be in there. Most are sitting outside the shop and leaking. I don't know what is being sprayed other than the paint removers and paint itself that is so choking and burning your eyes when you step outside. It must be bad.

Tip/Complaint:
Holding tanks are located on our property. Strong continues Sewer Ordors coming from the holding tanks. Jeremy Miller of DEP Stated that the odor was coming from The house behind the tank. The Nicholson Sewer Authority employee, Harold Luther stated he smells Gas & Oil. No one wants to test for the Strong Gas odors coming from the tanks. Our customers, & numerous others have commented on the smell. We are also concern that these tanks are leaking and going into the underground water. Its a new sewer system that needs to be checked out but no one wants to do it. Please Help. Something needs to be done.

Tip ID # 102165 Date/Time Received: 01/31/2013 - 11:29:00 PM Submitter: 	Alleged Violator: Hallmark Engraving, Inc. 27291 Garrett Hwy Accident, Maryland 21520 (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Release Media: Land Water Air Worker Entity: Company	Directions to site: From the town of Accident head south on Rt. 219 approximate 3 miles out of town. Pass Doerr rd on the right hand side of the road, MD wild life sign and it's the very next right. House at bottom of the drive is the owner Michael Hall, follow road to top of hill to get to the shop.
Subject: Referred to Region - Maryland Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102165-3800-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:
Tip/Complaint: The engraving company that I work at uses leaded brass to make signs. I was informed when I began working there in 2005 not to drink the water from the sinks, but was never informed as to why. I recently found out that we cannot drink the water because the brass signs are washed in the sink and the metal shavings then go in to the septic and drainage field thus contaminating the ground and water. I was completely shocked when the owner of the company explained this at a staff meeting. The company has been doing business for over 15 years at this current location and I feel that the homes around the business, the employees and environment are in danger.

Notes: Mr. Lauff followed up this tip with a petition to the Agency for Toxic Substances and Disease Registry (ATSDR) dated 3/18/13 that described exposure concerns about the Carter Impoundment. On 8/21/13, ATSDR issued its decision letter accepting his petition. In the petition, ATSDR notes that there is an air data gap but sufficient data for a focused groundwater evaluation. ATSDR hopes that by EPA receiving a copy of the petition might provide some additional motivation to conduct assessments of air quality near these flowback impoundments; a public health issue that we regional ATSDR staff feel warrants specific attention by environmental agencies. Finally, the actual health consultation which evaluates this data will take longer, at least until winter before it is final and released is ATSDR's best guess as of early September.

Tip ID # 102117 Date/Time Received: 01/31/2013 - 10:20:00 AM Submitter:	Alleged Violator: United Central Supply Company 4400 Callahan Avenue Andover , Virginia 24216 (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Dump/Buried Media: Land Entity: Company	Directions to site: Andover is located just a few miles outside of Appalachia...When you pass the andover bridge on the right the warehouse is located just around the curve also on the right side of the road...I wanted to send this tip anonymous because I still have relative working at United Central.
Subject: Referred to Region - Virginia Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-102117-3709-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Lead Closed Lat: Lon: Category:

Tip/Complaint:

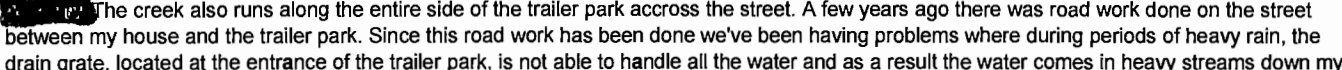

The oil house that is located across the railroad tracks from the main building should be your main point of focus...Oil runs underneath the walls to the outside area where it soaks into the ground or runs into a small drain that emptys into a near by river. This has been going on for over a period of years and the company has done nothing about it...Also the elevator shaft that is located on the main building has an oil leak and this is allowed to be drained into the parking lot located at the front of the building and into a drain pipe that also flows into a nearby creek....

Tip/Complaint:
 The trailer park is on a slight upward hill 
 The creek also runs along the entire side of the trailer park accross the street. A few years ago there was road work done on the street between my house and the trailer park. Since this road work has been done we've been having problems where during periods of heavy rain, the drain grate, located at the entrance of the trailer park, is not able to handle all the water and as a result the water comes in heavy streams down my

Ex.6

Ex.6

driveway to the creek. My driveway is stone and it washes away the rock, creates large divits and tears up the driveway. I've talked to the borough about it but they said it isn't their issue and I'd need to contact the owner of the trailer park. I'm not sure who is responsible, however my driveway and property is currently the pathway for this water run off and its created a lot of damage which we keep having to repair. At one point I was told by the borough, that the run off issue happened because of a tree blocking the creek's water path. Since then the same issue has ocured and I've taken video showing a heavy downpour, not obstructions in the creek and the water's path.

Tip/Complaint:
Filing on behalf of my son who is incarcerated at SCI Mahanoy. He is currently an inmate housed in a dorm with 7 other inmates. All seven smoke, my son does not smoke. This goes on throughout the day in a 24-hour period. My son has exhausted all his avenues but the staff/officers have not even investigated. I thought that smoking in prisons was a violation of the Clean Aire Act and liable for fines. My son is exposed to second hand smoke all the time, suffers from headaches and is sick all the time. It seems that the prison officials are not concerned with this issue at all and allow the inmates to continue to smoke. This is breaking the law and should be stopped. Please help me or advise me of someone who can help. My son is suffering and faces retaliation for all that we are doing to try to stop the second hand smoke. They stop it in hospitals so why can't the prisons abide by the laws and be fined if they don't. Please help.

Tip/Complaint: This is the FIFTH blow-down that sprayed us. DO NOT REFER ME TO THE DEQ. Mark Miller of the DEQ has been out to see the oil spray and says he has NO authority over methane. During a natural gas compressor station emergency blowdown, the neighborhood (fields, wetlands, ponds, crops, gardens, livestock) was sprayed with an oily substance, referred to by Dominion Transmission as a "Distillate". Apparently this distillate is comprised of butane, pentane, etc. (methane by-products?) The neighbors have showed the DEQ photos of cars covered with the oily drops. This is serious. People are raising vegetable gardens and eating produce sprayed with the distillate. There is concern for livestock grazing on fields sprayed with the distillate and groundwater contamination. The distillate is visiable on pond surfaces as an oily film. The DEQ cannot/will not get involved.

Tip/Complaint:

there is a gas well south of my home we can not breath when we go outside from the odor of natural gas it is so strong at times you have to cover your mouth to get to the garage. we can not do anything outside without finding it very hard to breath because of the odor. it gets in your throat, not sure how healthy this is. I have called the north east township, no help. there is no number on the well for contact. if you can give me any direction I would appreciate it. I hope to be able to enjoy my yard again soon.

Erosion is on left and rear of 4816 Bradford Drive when one is facing the house from the street.
Subject: Referred to Region - Virginia Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101898-3709-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
Rapid erosion of creek bank at end of gambion at rear and side of property located at 4816 Bradford Drive that Fairfax County installed in 1972. Erosion is undermining lawn, trees and forest growth on both sides of creek. Lawn erosion has created a safety hazard for walkers along the creek. I can easily capture damage with photos if requested to do so. County planned to remove gambion and construct a wide channel and periodic ponds/holding tanksto reduce water velocity since perhaps 2006, but continues to postpone the project though erosion damage expands dramatically and continually.

Tip ID # 101869 Date/Time Received: 01/24/2013 - 8:56:00 PM Submitter: 	Alleged Violator: J.c. body shop 813 nassau street Charlottesville , Virginia 22902 (Region 3) Date of Violation: 01/24/2013 Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Release Media: Air Entity: Company	Directions to site: the only area zoned for commercial use on Nassau street. Between Florence rd. and Hampton St. On Nassau street.
Subject: Referred to Region - Virginia Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101869-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:

The body shop burns more than wood in their shop. Things such as plastic or chemicals produce a thick black smoke that bellow's out of the smoke stack. The smoke burns eyes and makes it extremely hard to breath while just walking outside. I have taken pictures of this thick nauseating smoke that more often than not falls to the ground. This usually lasts up to a hour. There has also been a increase of residents living close to the shop that have been diagnosed with cancers. Coincidence or not? I have no idea. I do know that if a company cared about anything other than pure profit then this wouldn't be an issue.

Tip/Complaint:

Yes, there is a company that has gotten permits in my area around Tamarack Swamp around Corry that is dumping frack waste into the swamp and there have been people protesting the move that is I do not know the name of the company responsible for dumping the waste into Tamarack Swamp, but I do know that it is from a fracking of the local area, according to my mother and several people that she knows around Corry. I am concerned about this company dumping frack waste into Bear Lake and Tamarack Swamp, which are both watersheds where much of the town's drinking water comes from. This could potentially create cancers in the drinking supply that could cause people to become sick. Can you do anything about it? They've gotten some shady permits from local officials to do this dumping into the swamp. This is a very serious matter that affects the health of everyone who drinks the water in and around Corry, Pennsylvania. Can you look into it? [Redacted]

Notes: Dear [Redacted]: Thank you for your recent email that expressed your concern about a company that recently received permits to dump fracking wastewater into Tamarack Swamp. On November 29, 2012, the U. S. Environmental Protection Agency (EPA) issued two Underground Injection Control (UIC) permits to Bear Lake Properties, LLC for the disposal of fluids produced in association with oil and gas production. However, these permits are written to allow injection into the Medina Formation (a depleted natural gas production reservoir) approximately 4500 feet below land surface, not into the Tamarack Swamp. These permits, in fact, have been issued to protect underground sources of drinking water and the dumping of any wastewater into any surface water body is prohibited. If you or anyone else has actually observed the dumping of wastewater into the Tamarack Swamp, we urge you to again contact the EPA or the following Pennsylvania state agencies: Steve Kepler, Pennsylvania Fish & Boat Commission, 814-359-5117, Kerry Speelman, Pennsylvania Fish Commission, 717-787-4250 ext. 3604 or Erin Wells, Pennsylvania Department of Environmental Protection, 814-332-6928. S. Stephen Platt U.S. EPA, Region 3 Ground Water & Enforcement Branch (3WP22) 1650 Arch Street Philadelphia, PA 19103 215-814-5464

Tip/Complaint:
 VW Of America implemented Emissions Recall Campaign 28E6 in summer of 2009. This campaign replaced 7V Ceramic Glow Plugs with 5V Steel Glow Plugs. This campaign was done to stop engine failures as the ceramic glow plugs would fail, fall into engine, and bend valves / break pistons. During Dec 09 to April 2010, nearly all vehicles that were modified by VW would fail to start or they would start and belch massive quantities of black diesel fume / smoke for up to two minutes (You tube had videos of these cars). I contacted VW of American in Jan 2010 and local dealers, they stated they had no solution to the glow plug / starting problem. Note that the Ceramic 7V plugs would deliver about 125 Watts of heat per cylinder versus the 25 Watts for the 5 V Steel Glow Plus. Around Nov 2010, VW America rolled out another Emissions Upgrade that was to correct the first one, that new Emissions Upgrade is 28F6, and deploys a 7V Shield Glow Plug from NGK Corporation. That plug works as original intended. Here's the problem. VW of America never sent out the 28F6 emissions recall to "ALL" the owners of the 2004 to 2006 VW Turbo Diesel Cars. During 2011 and 2012, I would contact the local dealer and was advised, there is no recall campaign for my emissions controls and there is no solution. Therefore I continued to belch Black smoke during winter for each cold morning start. However, in Jan 2013, I contact the dealer again, and asked, was told, there is still no recall for your vehicle, sorry. I then went onto the various VW TDI forums on the Web, and found the 28F6 Recall. Forum members are reporting that some people got the recall and some didn't. I contacted VW of America, they confirmed that they have

Page 1

emissions recall 28F6 but admitted that they did not send it to all effected cars. They claim that they will help solve this problem. Yet I have been calling them (7 times now) in past 3 weeks and they continue to stonewall me, by telling me that the decision maker will get back to me. I've taken my car into the local dealer, they verified that there is an Emissions Warranty 28F6, we have confirmed that my vin number matches those cars effected, I have left my vehicle over night with them to verify it has the hard starting smoke belching problem, yet they refuse to fix it stating that VW of America has not assigned the 28F6 Emission warranty campaign to my VIN number. The Service manager pulled up my VIN number and that campaign is not assigned to my car by VW of A. I would imagine that there are lots of these cars that have the same problem from VW. Further, I have found references that 4 other car brands used the original 7V Bosch Glow Plug and those were replaced by the 5 V Bosch glow plug and those cars have the same problem. The remedy is you have to install the 7V NGK glow plug, a new Glow Plug Controller, and reflash the ECU program to fix these cars. I'm somewhat shocked that I have been calling VW for 3 years and getting a run around. This is a common issue brought up on the forums. People are resorting to altering these cars to get them to start, including using older 11V glow plugs and modifying the ECU programming codes. I'd say it is time to bring in the support teams from the EPA and the NHTSB. I can scan in and send you the summary information that I provided to the local VW dealer. it is still not clear to me if VW of America is going to fix this car or not.

Tip/Complaint:

Employer and/or employee of Bristow Automotive spray paint cars in the open. They have no spray painting booth. I am an employee working at the next door; I have to walk out (work half day) because the paint smell is getting into me. I was getting a very bad headache. Another co-employee quits her job because of this smell. This has been going on for weeks now...in addition, we have several customers walking into our store complaining about the smell. This is very dangerous; we can really get sick with the way this company operates. Please, please, investigate. I do not think they are in compliance at all.

Tip/Complaint: I made a complaint a couple months ago and the pollution stopped. Now it is happening again. Tanker trucks are discharging a fine clay powder that is used to make cat litter. It is being discharged because the overflow is not being cleaned off before going down the highway. I have spoke to the terminal manager, Tom Earnhardt and Jim Weqlicki from there corporate headquarters several times but the problem continued. I have read that this power is a carcinogen that makes me so concerned. They are also discharging lime dust.

Recipient: Regional Tip and/or Complaint			

Tip/Complaint:
Old gas tanks may have been missed in a recent boring exercise due to test placement not being appropriate. The lot was tested as there are plans of development for a residential building on an empty lot. According to old maps, there were two automotive gas stations on the lot, however long-term residents of the lot do not recall the tanks being extracted. Consequently, there are legitimate concerns how the recent boring tests could conclude otherwise. Additionally, the boring holes for gas tanks may have been significantly off from any actual obstruction, per the view of residents. I am a concerned resident of the area and would appreciate a thorough review of historic maps to identify the tank locations, an overlay of the boring holes to those maps, and a review of any documentation on whether the tanks have been removed. The property developer has been named the "violation" however this may be better suited for the land owner.

Tip ID # 101718 Date/Time Received: 01/19/2013 - 3:49:00 PM Submitter: 	Alleged Violator: Jimmy McWilliams, Tango Down Range 1391 Allensville Road Hedgesville, West Virginia 25427 (Region 3) Date of Violation: Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Intentional Type: Dump/Buried Media: Land Water Documents Entity: Individual	Directions to site:
Subject: Referred to Region - West Virginia Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101718-3708-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:

In late 2010 Tango Down Range opened and began operation at 1391 Allensville Road, Hedgesville, WV 25427. I will not even try to hide the fact that the noise and reported stray bullets from the range is considered a disruption and nuisance to the community. In an attempt to seek assistance from local government we took our issues to the Berkeley County Planning Commission. At the Planning Commission meetings I listened as Attorney Charles S. Trump IV who represented Tango Down range said his client "absolutely wants to comply with the law and certainly has." Mr. Trump said the business owned by Jimmy McWilliams has been operating on a shale pit site owned by Robert Butts, who still mines shale from the property. Mr. Trump claimed mining activities are exempt from county regulations. This raised many questions for me regarding the deposit of lead at the site and the surrounding areas from the impact zone of the bullets being fired, as well as stray bullets and ricocheted/fragmented bullets. Another issue that was brought before the Berkeley County Planning Commission was stray bullets and ricocheted bullets being found by property owners who reside behind the shale based earthen backstops of the range. While I have not seen it personally, neighbors behind the range claim that the trees behind the shale based earthen backstops are riddled with ricocheted and stray bullets. During the meeting one of the range employees inspected some of the bullets presented as evidence by the property owners and noted they were not deformed in any manner. He claimed that this indicated they were not a ricocheted bullet from the range. This again got me thinking about the range and its design. There is a large pond which is located downrange from the shooting benches, between two shooting lanes. A bullet impacting a water surface could ricochet without being deformed. I then began doing some research online. I entered the words "Tango Down Range" into a search engine and discovered the website AR15.com. This website is actively used by many firearm enthusiasts and the Range Officers who work at Tango Down Range. I soon discovered a thread where the parties involved are discussing Tango Down Range and "Simms13" states, "Yeah Abe and I tend to be up there now and again, yelling at people about shooting the pond and all. Of course we've never shot the pond! [img alt="Facebook logo" data-bbox="605 760 625 775]". By searching through the threads I have been able to identify "Simms13" as David Simerly. Mr. Simerly is a Range Officer at Tango Down Range and also works at Tannerman's Pawn Shop, which is owned by Jimmy McWilliams. Abe is also a Range Officer at Tango Down Range. I have also found evidence which shows that fully automatic weapons were being used and rented on this range as well as tannerite. A video is posted on the Tango Down Range Facebook page which shows one of the Range Officers standing in the pond at the range. He drops a rifle into the water, then picks it up and begins firing it while still standing in the water. This was done to show how durable the rifle was? In closing, being that the site was previously used as a shale pit I suspect that it is more susceptible to contaminating the local ground water with lead. All of the homes surrounding this site acquire their drinking water from wells. If Robert Butts is still mining the surface shale from this area as Mr. Trump has claimed I believe he is subject to the guidelines of the RCRA statue for hazardous waste and I strongly suspect that none of the earthen material being removed from the area has ever been tested. If the site is not an active mining operation then Tango Down Range cannot claim to be exempt from Berkeley County's regulations. Additionally, I believe shooting into the pond violates the Clean Water Act as well as creates a serious safety hazard for the residences residing behind the range. I have downloaded the videos from the Tango Down Range Facebook page and printed the conversations I referenced from the AR15.com site as well as the information I used to discover the parties identities. I have acquired much more information in regards to the management of the range than I disclosed above, but I feel this is the pertinent information to relay to your agency.

Tip/Complaint: An individual resident is washing cars seven days a week in his driveway and at his house. The neighborhood has no sidewalks, and the business spills out into the street, which is dangerous for dog walkers, car traffic and joggers. There has already been one car fire at this location. Numerous power tools, such as a compressor, buffer and power washer, are used and create noise and traffic congestion at all hours of day and late at night. Wash water with soapy suds in it is going down the nearby storm drain and to a nearby creek. A business as noisy as this one should not be in operation in a quiet residential area. Person submitting this complaint wants to remain anonymous, but can be called for further info.

Tip/Complaint: My husband and I put an offer in on this home. We conducted the inspection this morning. The entire first floor of the home smelled of fuel fumes. The inspector noticed the smell right away. He went in to the crawl space under the home and discovered that a leaking fuel tank had been removed (it was not disclosed, I doubt this was done legally) and that the fuel had leached in to the soil and foundation of the home. The inspector stated that the foundation was so contaminated with fuel that it would have to be replaced and environmental study and clean up conducted. It happened to be raining today. The water running out from near the home because of the rain had visible fuel residue on it. We withdrew our offer immediately. I just checked and the home has been placed back on the market. This home is near a water way and I am very concerned that there has been ground water contamination. This site needs to be properly cleaned up, tested, and the owners who are trying to conceal this need to be held liable.

Tip ID # 101557 Date/Time Received: 01/14/2013 - 5:28:00 PM Submitter: 	Alleged Violator: Toyota Prius 7401 McKnight Rd Pittsburgh , Pennsylvania 15237 (Region 3) Date of Violation: 11/13/2012 Violation still occurring?: yes Notified state DEP/DEQ?: no	Intent: Unknown Type: Falsified Media: Air Entity: Unknown	Directions to site: Hi, I have purchased Toyota Prius for better milage and less environment pollution. As per EPA, the prious should give 51 MPG in city but it is giving 37 MPG most of times by which there is environment pollution. I have asked the dealer to change the vehicle but my request was not obliged. I have only one vehicle and I was forced to use it. Please do the needful for healthy environment. Thank you.
Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101557-3800-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
The Toyota Prious car supposed to give 51 MPG in city and it is not giving as per EPA. The dealer and company did not try to fix the low mileage issue and causing environmental pollution.

morris.makeba@epa.gov,connor.garth@epa.gov	
Tip/Complaint: My account with wssc is [REDACTED]. The water main pike broke and i called the emergy line for wssc to come and cut the water off because it was flooded with wter and the water could not be cut off from the house I believe the insident happened in sept of 2009,and I believe after they replace the entire water line from to to bottom on lenham street the water was permanently cut off around May 2010,No one was in the house at the time i was just randomly checking on the house due to seperation with my husband. I have spoke with the resceptionist Laurie Savoy at wssc on 12/27/12 to investigate this issue and have the supervisor Mrs. Licette Villasanee get with me on the issue. to this day no one has investigate this issue or got back incontact with me the bill is over 5k. I am seeking you help. i believe that this fall under the 2005 legal settlement the US EPA clean water act, I am seeking your help for an investigation Thank you for your time and help assisting me in this matter.

Tip/Complaint:

I worked for this company and for the past 15 years they have been dumping lead based materials down the drains. The facility has a septic tank and is not on a town sewer thus allowing the leads to leach into the ground water. There is a Housing subdivision directly behind this facility.

Tip/Complaint:
Terrell Greathouse, who lives 0.9 from Rt. 7 on Ash Camp Run Road, WV, is burning protective conduit off scrap wire out in the open with all kinds of garbage around the house and trailers. He is also burning tires. The smoke comes down the road and blows by my barn. The smell is unbearable, and toxic to the lungs. Please address this ASAP. His home is located on the last home on the right hand side with all the trailers, vehicles, and junk in the yard.

Tip/Complaint: My sister and I rent an apartment in erie, pa. we have had a black mold issue for 2 year. The mold is on our basement ceiling which is our living room floor. I addressed this issue with the landlord last year (2011). They replaced the basement ceiling and insulation but did not correct the problem causing the mold. Again this year (20012) we had the mold issue again. Again we notified the landlord. Maintenance did spay the ceiling with something made for mold. This has now trapped the mold between the basement ceiling and living room floor. Our heating duct work runs between the basement and living room. Now when the heat turns on the mold spores and fumes come into our living areas. Again I notified the landlord regarding this issue on January 2, 2013. Nothing has been done. My sister and I are sick from this issue. We have to keep our heat down so the mold doesn't go through our living areas. Due to keeping the heat down our living areas are very cold. I am 61 and my sister is 57, both have copd. The mold is causing our problems to become worse and now we are developing other health issues due to being subjected to the mold for so long. Please help us. We have done everything that we know to do. We contacted our health department which could not help us. Please help

Tip/Complaint: Input by Matthew Lee, OECEJ, 1/8/2013. According to caller: Back in 2011, well water started to taste salty. He got water tested by DEP and Barium and Selenium were in water. Also smelt oil/diesel from hot water tap. There is an Atlas Fracking well within 1.5 miles of his residence, however well has never produced gas. Caller recontacted DEP in March, 2012 to retest water, which they did but did not test for barium nor selenium. Caller called DEP back to inquire about lack of barium/selenium testing and DEP rep went into tirade and called him a jerk. DEP supervisor, "Frank", was equally dismissive. Caller is Prof. @ Penn State and is worried about study linking barium and fracking and is concerned about long term exposure. Submitted by Matthew Lee, OECEJ, 1/8/2013

Tip/Complaint:
 At 10pm 12.30.12 a very loud sound started that I could here IN MY HOUSE. It woke up my 79 yr old dad who came downstairs to ask if it was drilling related. I stepped onto my kitchen porch to hear the loudest sound to date..louder than natural gas well flares within a mile from my house. I knew it was not a flare as the sky was not flickering. I drove the WILLIAMS CENTRAL COMPRESSOR STATION about one mile up my dirt rd, flashed my lights, at the chain linked barb wired facility. The security guard came out and said there was a problem, the system did not appear to be automated so he called his boss (TROY ENERGY) and they contacted Williams and a repair technician was on the way. He said they had been testing new equipment, and the day before there was a failure that only lasted like 30 secs. He told me the LOUD SOUND was a failed compressor, I told him there were no permits yet for compressors on site. I called Helen Humphries WILLIAMS LLC and left a message wondering what the sound was and what # should residents like myself call to get information about situations like this one: what is it, is it dangerous should we not light a cigarette burn garbage etc. I called PA DEP 12.31.12 and email Ms Nestor a letter I sent to Helen Humphries. On 1.3.13 I finally spoke with Helen and she said she thought it was a failed flange in a dehydrator valve . I asked if that LOUD sound that lasted for an hour was raw gas under pressure being released into our air and community...she said yes. I have had NO ANSWER from PA DEP about this incident on my hill more than a week ago....no field agent called or anything. Williams also has not officially responded. I called Bob Stoud the EMA for Susquehanna CO and he did not get back to me either. I still have no answer from PA DEP or Williams as to what happened on 12.30.12 at the Williams Central Compressor. Here is a video my friend made so you can see it is documented <http://www.youtube.com/watch?v=5aGqKHR1M-8>

Tip/Complaint: There is asbestos debris that was burned on his property and had been buried on the land. There is a creek that runs in the area where the hazardous materials were buried. The owner also used the water from the creek to water plants that are sold to other consumers. This is just one of the numerous illegal activities that pertain to the safety of the land and water supply that have occurred on his property.

Ex. 6

Ex. 6

Tip/Complaint:
 A worker (working down the street) carrying a can of rust-colored chemical dumped it into the storm drain in front of my house. (metal primer?) It has stained the whole street in the area it was dumped, and smells really bad. We have photos of the substance as it is still all over the street. We saw the worker pass by as we were leaving our driveway, stirring something, and wondered why he was heading up the street with it. We saw the mess when we returned from our errand, with chemical running down the storm drain. Happened between approx. 2 and 4 pm.

Tip/Complaint:

Dear Sir or Madam, The following video has come to my attention, which describes the release of a hazardous materials used in hydraulic fracking, silica dust. ... It documents the operations at the Wyalusing Silica Sand Transfer Station, and notes that it is located "within a mile of 3 public schools and right next to a large daycare center." https://www.youtube.com/watch?feature=player_detailpage&v=-ITCRJ6I_zM I cannot verify all of the facts of video, but believe it is my duty as a citizen to bring this to your attention - given the risks of hazardous material to workers cited on the government-based website that follows and the reported proximity to the schools. http://www.osha.gov/dts/hazardalerts/hydraulic_frac_hazard_alert.html Please advise.

Tip/Complaint:
they had employees spread plastic out so they could bury happen when they were making buisness area bigger. Plastic had oil field contaminants all over it plastic was used for containment on well pads when they drilled wells,fraced well or from workover rigs , had oil, hydracloric acid,hydraulic fluid,biocide,friction reducer,drilling mud and list goes on. They burried tons of it. Started burrying around wherefuel tanks are hope run off didnt get in creek since it is located next to towanda creek, my dauters swim in that creek.burried around 6 ft or so under gravel and dirt

Tip/Complaint: Haz Mat spill from 30 years ago was not properly taken care of, the ventilation system put in place was not maintained and was shut off so the surrounding homes were contaminated, Hess bought some of the homes but the streets are still full of red and orange colored water with an oily sheen on top. There are noxious smells of oil and the water leaks directly into the water drains that lead into the Chesapeake Bay. Hess' negligence as well as their wilful and deliberate failure to maintain the systems caused my neighborhood (my home as well) to become a hazardous materials haven that directly effects my life and well being.

Tip/Complaint:
I recieved a well water test 5/11/11 from the Pa. DEP after my well water began to taste salty. The results indicated Barium 1.79 in my water supply. An unconventional waste fracking well is aprox 1.5 miles uphill from my house. My well is shallow (60 ft). Pa DEP has failed to address the cause of the Barium. I requested a second test conducted 4/12 and Barium was not looked for by the DEP. Pa.DEP continues to avoid discussing this issue and as of 1/2/13, Bill Keefer of the Pa. DEP refused to discuss the matter and attempted to "scare me off" through the use of abusive language.

Tip/Complaint: He demolished a property that contained asbestos, and brought the infected materials to his property and burnt and then buried them. He has also dumped and buried other demolition materials on his property and has never had any permits that allowed him to do this. The area where he buried hazardous materials is close to a creek and could possibly contaminate the water supply. He also digs in this area and sells the contaminated topsoil to unsuspecting customers. This practice has been going on for a very long time.

Tip/Complaint: I work on the Battleship Wisconsin in Norfolk, and I am well aware that your agency has advised the management of our organization to disallow workers to continue to access unauthorized spaces in the ship like the engine room a few months ago. It has been brought to my attention that			

some employees that are not authorized to access the lower levels of the ship may be continuing to go down into those levels. From what I've been told, upper management has been notified and has done nothing other than post a notice, while the offenders continue to go into the ship. Thank you for your time, BB-64 Employee

Tip/Complaint:

Every day they flux their furnaces. There are toxins put into the air from the stacks on the furnaces. They are not filtered in any way. On a humid and damp day, you can see the clouds of smoke hovering near the ground. They normally do this fluxing between 12:30 and 1:30 pm. Daily Monday thru Friday. You can sit across the street at the rock shop and see it.

Tip/Complaint:
when i left for work this morning at 6am and opened the garage door to get in the car, the smell was so nauseating i had to hold my nose and run to the car. The smell is so bad it is as though i am standing in a sewer. This odor cannot be beneficial for humans to consume thru the air we breath. The smell stays in the car and gets on my clothes and is as though i should spray myself with fabreeze because i know the smell stays on my clothing. If this smell is so terrible miles away from the factory, I can only imagine the horrible working conditions underwhich people must work. It must be unbearable to breath in that stench every day.

W. 2

Tip/Complaint:

At the end of the housing development I live at is a flood plain. It feeds a creek and drains the near by area. There were bulldozers and steam shovels in there digging things up. I think they are ready the land for some houses. The run in this area has a lot of volume in a rain storm. I can't believe they got a permit to build there.

Tip/Complaint:

I've been contacted by a Civil Engineer James Harshman (724) 350-2814 and Don Biley, owner of Bigley Plumbing (412) 276-2736 in regard to a sewage line that was placed in my alley by Houston Borough over 3 years ago, just prior to moving into my current address. Dye tests by Mr. Harshman were conducted at several locations on my street concluding that several if not all homes were never re-connected into the newly installed sewage system. As a result the "Old, Capped Off" sewage system has been being used for the past several years as a large septic system! This was realized after a neighbor evacuated his family due to sewage back-up. Also this sewage has seeped into basements in the area along with visual puddles on the streets (East Grant St. rear Alleyway). Plumbers scoped several pipes in the area and confirmed this months ago with no action being taken! I fear of how big an issue this may actually be and my township is not taking proper clean-up action. This will only get worse as all of these homes may still be connected into the old sewage system. Please help!

The materials are buried at various locations on this property.
Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101202-3708-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
 During the demolition process of the old dorms at IUP in Indiana, PA, Mr Cummings hauled hundreds ---if not thousands of truckloads of concrete filled with rebar and other hazardous materials onto his property and buried it without the proper approval to do so. This hazardous material is located near a creek which can run into the drinking water or other sources. His company is currently burning and/or burying products that contain asbestos. He feels that he owns the property and can do whatever he wants on this land. He did obtain the proper road bonding permits required by Penn Dot when the trucks were hauling the hazardous materials. He only did this because there is a weight limit on Anthony Run Rd and someone turned him in. He is also diverting a creek that runs through the property in order to supply water for some plants that are stored there. These are just a few of the items he has done---come look around---it's amazing what else you will find. His company sells topsoil that is from the polluted land in question to unsuspecting clients.

Tip/Complaint: Witnessed carcasses of original Climate Master water source heat pumps (28 years old, replaced by Water Furnace units) pillaged for scrap metal: coils and compressor motors) on the loading dock at the Somerset House I complex over the month I worked there as a mechanic. Activity evidently supervised by Senior Porter.....no recovery cylinders nor related appliances could be found in vicinity of this operation in a remote trash compactor room adjacent to loading dock. Inquiry made by me to the Porter regarding recovery of R22 was that it was being done. Operation			

2-12
[REDACTED]

2-12
[REDACTED]

ceased the following day and my remaining time there, all replaced units were removed from premises as whole appliances. I am suspect that this activity was continuing elsewhere without regard to law. Estimated replaced units in this 20 story exclusive hi-rise over many months...250. I am a staunch environmentalist, HVAC instructor, and hold CFC Universal Certification. Please look into this as I have a feeling that the Condo Association knew of the metal recycling by this individual(s) and is still responsible for refrigerant recovery.

Tip/Complaint:
Good afternoon – Please be advised that we have a contractor in the building working with our fuel tanks outside on the loading dock. Unfortunately, he has spilled some and has ridden up and down our freight elevator, getting the smell throughout the building. THERE IS NO REASON FOR CONCERN. I apologize for the smell and we will vent the building as quickly as possible to disperse the odor. Thank you for your understanding, Karen S. Coble Senior Property Manager Lincoln Property Company My issue is that this odor is still very strong and in the air on the second day. If it was just a spill on someone clothing sohould be gone. Currently the smell is bothoring employee(coughing, eye's burning and headaches.

Tip ID # 101116 Date/Time Received: 12/22/2012 - 9:43:00 PM Submitter: 	Alleged Violator: San Ildefonso de Culebra, Inc Unknown Culebra, Maryland 00775 (Region 3) Date of Violation: 12/22/2012 Violation still occurring?: yes Notified state DEP/DEQ?: yes	Intent: Intentional Type: Fill Media: Land Water Entity: Unknown	Directions to site: Culebra island is located 15 nautical Miles from the east coast of Puerto Rico.
Subject: Referred to Region - Maryland Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101116-3709-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:

A critical habitat in Culebra, PR lagoon is being threatened by a building developer who is preparing to cut down approximately ten thousand square feet of red mangrove (Rhizophora mangle). This is being done to reclaim land to build a 30 room hotel on a critical habitat area. Although permits have been extended, thus action is clear violations of the US clean water act and counters strict wetlands conservation protocols. No Clean Water Act Section 404 permit application or jurisdictional determination has been submitted for the proposed project. The exact location is 18 deg 18' 8" North, 65 deg 18' 2.4". More information and pictures can be obtained at: www.facebook.com/CORALiations

Tip/Complaint:

First General Services of Northeastern Pennsylvania (FGS) performed deconstruction and reconstruction activities as the result of a fire in a pre-1978 house in West Wyoming, PA. The work began in July 2012, and is continuing through December 2012. The homeowner and her representative have inquired about lead-based paint hazards on 3 separate occasions, and have been told by FGS that LBP and the RRP rules do not apply. More than 6 square feet of painted surfaces in the home have been impacted and renovated. FGS has also failed to provide the owner with the "Renovate Right" brochure, also requested on 3 separate occasions. The owner is also expecting a grandchild in January 2013, adding to her concerns about lead dust contamination throughout the home.

Tip/Complaint: In Lancaster County PA, many Farmers tell you they don't read or speak English so they don't know they are breaking the law when their livestock stands in creeks or when they burn huge plastic containers off State Road 89s between Strasburg and Delaware. Many people from all backgrounds, burn their garbage after 5 and on weekends when no Fire Marshall is working. Start a Youth Facebook/Kindle/iPhone program to create a picture/video record of anyone burning anything in Lancaster County. Or anyone whose animals are messing up the creeks and hence, The Bay. Offer small prizes for anyone whose video is delivered to the offender with a guide as to how to comply with the law. Or have the kids deliver it with adult supervision. Make a school program, put it in the paper, put it on WGAL.... Sometimes the air is so bad here I gag on my way to work, literally gag, and I don't have any conditions. The air from the manure spreading is so full of that odor, the smoke is so thick--that I speed up or must roll up the windows--sometimes we can't work or play outside with the children. So one person drives a whole community inside.

Subject: Regional Tip and/or Complaint - Virginia Recipient: Regional Tip and/or Complaint morris.makeba@epa.gov,connor.garth@epa.gov	HQ Lead Number: FY13-101081-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:
Tip/Complaint: The entrance/exit to the Luck Stone quarry is a little over one mile from the entrance to my neighborhood (Glenmore). We have to drive past Luck Stone to get almost anywhere (grocery, hospital, drugstore, etc). There is a perpetual dust cloud around the intersection of the entrance to Luck Stone and Route 250 near Shadwell, VA. I am concerned about the level of particulate matter we are inhaling as we drive by. Sometimes a water truck wets down the area. Not all the time. Many of the trucks exiting are followed by a cloud of dust from their load. This is a request for EPA to measure the particulate level and let the public know whether it is a hazard or not. If a hazard, I would request more wetting down the road to keep the dust down. Thank you, Barbara Fontaine

12/19/2012 - 8:56:00 PM Submitter:  <i>Exp. 6</i>	949 Ruby Drive Westminster, Maryland 21158 (Region 3) Date of Violation: 09/15/2012 Violation still occurring?: yes Notified state DEP/DEQ?: no	Entity: Company	over to my house to verify that L&R Construction and Remodeling did not take the appropriate lead based paint precautions when they were renovating my 1904 home.
Subject: Referred to Region - Maryland Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-101065-3712-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:

I hired L&R Construction and Remodeling LLC, as my general contractor for a HUD backed Home Renovation Project. Part of the project involved painting both the interior and exterior of my 2,962 square foot house that was built in 1904. Although the company is listed on the EPA website as being lead paint certified, the company took NO precautions to prevent the release of paint chips and dust during the project. I have paint chips all over my roof and on the ground outside. I finally did a "stop work order" and demanded binding arbitration from the AAA according to our 203K Owner/Contractor Agreement because of quality concerns I had with the company. It was not until I started researching that I found out they should have been taking appropriate actions to contain the paint chips and dust they were kicking up all over, both inside and outside during the construction project.

Georgetown Universty leases the data center space from AINET. AINET is the building owner/operator in Laurel, Maryland.
Subject: Regional Tip and/or Complaint - Maryland Recipient: Regional Tip and/or Complaint morris.makeba@epa.gov,connor.garth@epa.gov	HQ Lead Number: FY13-101056-3714-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Assigned Lat: Lon: Category:

Tip/Complaint:
At a AINET data center building leased to Georgetown University in Laurel, MD, toxic fumes are being released from a large battery room containing 80 Valve Regulated Lead Acid Batteries (VRLA). The batteries are utilized to give the data center an Uninterruptable Power Supply (UPS). In order to have a UPS, the batteries are constantly being charged, and a combination of sulfuric acid fumes and lead oxide is vented from the battery room of the data center. Employees in the nearby offices there are bothered by headaches, redness of eyes, sore throats and breathing difficulties. Battery room is not properly vented, improper duct work during the renovation and it was not built for battery storage or charging. Building was previously an AT & T switch center that was then converted to a data center. In June 2012, there was an especially bad release of fumes to the office staff after one of the batteries cracked or ruptured. This complaint was received over the phone by Garth Connor, of the OECEJ staff at EPA Philadelphia.

Tip/Complaint:
My name is [REDACTED] I am a single 45 yr old woman who used to be very active, mountain biking, kayaking, hiking, running, ski instructor.... I moved to a farm across the street from the quarry almost 4 years ago to be closer to my outdoor activities and the mountain i teach at in the winter time. Over the last 4 years I have continued to get sicker and sicker, affecting my ability to work consistently and keeping me down and in bed for weeks at a time. After the process of elimination...well water, allergies, and a lot of research i've learned that the quarry dust is not only messy but very toxic and has been affecting my animals and myself in a very bad way. it is literally killing me. This past 3 weeks i have been down with lung/breathing issues. After learning about the quarry dust just yesterday, I am now making plans to move as soon as i can, but i need answers. What are my rights? How can I find definitive answers about the air quality on my farm? Please help! Thank you.

Tip/Complaint:
The owner Ramax Realty has been remodeling some appartments with out permit at 817 Park Ave, They are throwing what appears to be lead painted products and debris from the second story rear deck to the ground and dust and debris are blowing all over vehicles and the surrounding area. I'm a lead certified contractor and I'm concerned that there has not been proper lead testing and removal. I was working near by and saw debris thrown from the porch and scattered all over the alley and clearly they are not concerned with possible lead possioning of there tenants and neighbors. The individuals doing the work were in regular work clothes and were not using respirators.

Tip/Complaint: Property is part of clean and green. They were rezoned and told they must clean up lead shot every four years. Tried selling the property and admitted they have not cleaned up the lead shot. Told to bring in company registered to do the job and file that this has been done. Only indication has been they pushed the dirt up in a pile which when it rains runs down into a lake with dirt and lead pellets. When trying to sell they admit the property has not been cleaned up.

Tip/Complaint:
There is a illegal dumping ground in the gated community of Sherwood Forest, that the county or state nor city knows about that backs up to brewers pond and runs into the severn river. Leaves, trees ,debris, mulch, wood chips, deer and other animal carcasses, rock, dead and rotted limbs, community yard waste and other unknown trash that is covered up and pushed over the cliff into the stream to breakdown and make more room to dump, by bob cat and tractor. i was told when employed there to not tell county city or state officals about it because they do not know about it and they did not have permits or rights to be dumping there. i have recently been terminated from working there and now feel that i cant loose my job for filing a complaint.

Subject: Referred to Region - Pennsylvania Recipient: Regional Tip and/or Complaint	HQ Lead Number: FY13-100997-3709-CV Ref. Lead Number: Case Number:	Message Referred To: Region Credible Threat: Priority Term: Language:	Lead Status: Lat: Lon: Category:

Tip/Complaint:

On 6/1/2010 I took a picture from my bedroom window of the hole that was dug by my landlord Robert Burley and later that day when he came for the rent money I asked him when he was going to fill the hole in and he told me that the person that was to fill the hole in had gotten sick and that it was going to be filled in soon. He told me that the reason for digging the hole beside my mobile home was that he was trying to locate the water and sewage pipes. In July Robert Burley dug the yard up and installed a pvc pipe and I later learned that it was a sewage pipe and test results later that was taken from the SEO results showed that 80000/100 fecal and other contaminates was being drained into the stream. Boiling Spring Run in Kimmel township, Bedford county PA. My son and I were having health problems that started in July of 2010 and are still having health problems since the landlord broke a sewage pipe right outside my bedroom. Also I later found out that the tank that is buried at the garage was being pumped out and drained down on our home, I have pictures. I have tried to get help from many agencies and there is also a detailed report that the sewage officer had wrote up that states that this mobile home park should have had a sewage treatment facilities and NO attempt to fix the sewage malfunctions since, also included in the SEO's report a Sewage Treatment Facilities Letter with cost projections dated 4/1/80. Robert Burley did illegal repairs, no permit, and drained sewage and contaminates into a so called protected stream. Robert Burley did not inform me that he had broken a sewage pipe and July 30, 2010 I had looked under the two boards that he placed over the hole he dug and it bubbled. I had investigation done and some of the findings were that due to the broken sewage pipe beside my home caused gases to enter our home due to the seepage of sewage and pollutants, making our home unlivable. I have the report, pictures and videos and other findings that I will share if this is investigated and I am contacted. Also the are gas tanks that were let in the ground and never properly removed or drained, until 1/11/12 from DEP, but still no charges have been filed for the illegal repairs, digging a hole and braking a sewage pipe that caused harm on my son and I, pumping contaminates down on our home from the tank at the garage in the middle of the night, and illegally draining contaminates into a protected stream. I have asked many agencies to address this as I have concern for the children that are living there. In April 2012 there was sewage coming into a mobile home where two young children are living and the sewage came up into the home in their sinks and tub etc. and I filed a report to the sewage officer and the township and the sewage officer did file charges on this incident and Robert Burley was found guilty for illegal digging without a permit in April, 2012 and stated that he no longer has anything to do with the mobile home park but continues to move others into this park that has no working sewage system and also the water lines from what I was told run along the old sewage pipes. My son has a bacteria that he will have to live with from drinking that water. I ask that some kind of justice be done as the landlord cares not for the safety and well being of human health nor the environment and continues to violate the Clean Water Act. I pray that I can find some kind of justice for the poisoning of my son, as his life has been very difficult since. On 8/1/2010 a reporter from the Bedford County Free Press came and did video as David Ebersole a property owner that lived down stream and that has been filing reports since the early 80's called. Robert Burley never repaired the sewage pipe and from witnesses he just filled the hole in with dirt never repairing the hole. I would never had moved my home into this place if I would have known the history here. I am asking for help and also asking if their is any grants and funding that can help clean this place up for the good of all in this area and to protect the environment and human health as this all drains downstream.

I pray that I can find some kind of justice for the poisoning of my son, as his life has been very difficult since. On 8/1/2010 a reporter from the Bedford County Free Press came and did video as David Ebersole a property owner that lived down stream and that has been filing reports since the early 80's called. Robert Burley never repaired the sewage pipe and from witnesses he just filled the hole in with dirt never repairing the hole. I would never had moved my home into this place if I would have known the history here. I am asking for help and also asking if their is any grants and funding that can help clean this place up for the good of all in this area and to protect the environment and human health as this all drains downstream.

Tip/Complaint:

airliners spraying plumes of aluminum all over the skies on sunny days like today. I am fed up with it. Its been going on for years. Stop them NOW!!!! The aluminum is mixed in the fuel of commercial airliners to cover the sky with reflective aluminum and cover the earth with powder aluminum oxide. Yeah, if thats not a violation of everything thats right nothing is. I want action or I'm starting a battle with the EPA .

Intent: Intentional

Type: Dump/Buried

Media: Land Water Air

Entity: Company

Directions to site:

How do I go about reporting a company in Hampshire County in the town of Romney who is breaking the law? They are putting all paint etc into a furnace to burn instead of disposing of correctly? Romney and WV has high rates of non smoking lung cancer and four young boys with asthma have just moved in yesterday next to the store in question. It was an old paint and hardware warehouse and they are trying to clear out things. They had an auction in the last month but most things did not sell are now disposing of everything in furnace the smoke is so sooty that four newly painted house in area are being smoke damaged. We are all seniors without husbands an afraid to say anything. We do not wish to have our pets poisoned or targeted by neighbor's gossip etc. The building in question is on the same block as 4 suspected arson and questionable fires in the last two years. The address is located at intersection North Bolton and Birch Lane Romney WV. Other houses in area have done the same type of burning because they do not wish to pay dump fees. Several houses less than a block away continues to burn

4-28
[REDACTED]

			all building roofing shingles etc. They have gypsy home improvement companies and bring in paint, insulation, boards leftover construction and actually pull up loaded trucks onto driveways to make access easier to burn in the houses. One house that burnt down was a rental on a dirt floor a real shack where mentally challenged people were living and were using leftover wood to keep warm; on the same block are other horrid houses that are awaiting bad things to happen. I have contacted churches to no avail. I am physically challenged so it is hard to leave a way to be reached' but my heart is breaking at the thought of what can happen, Thank you for any help. Here is the email at library where someone can help me . [REDACTED]

Tip/Complaint: Approximately 60 yellow school buses are parked in a maintenance yard/depot at the bottom of a ravine. Every school day, from approximately 6:30am until 9am, the school buses start, idle for awhile, then leave the maintenance yard. As the buses are in a ravine, there is a smell of diesel exhaust that permeates through approximately 40 homes (120 people) in the direct area. The situation is exacerbated when there is little wind, which occurs quite frequently. Caller is concerned about the health of the his family and other local residents, as expressed to Rivhard Killian of R3 OECEJ.

Tip/Complaint: Since (about) 12/5/2012 there has been a very strong chemical order present along a small section of Rt476 between Balligomingo Road and Route 76. In looking at a satellite map this morning, it seems the likely cause is from the PECO gas plant. This has been ongoing for a week and I wanted to raise the concern as this is not a normal smell found in this area. I've been commuting past this point for the last 15 years and feel it should be investigated.

Tip/Complaint:

The company has intentionally disregarded the rules and regulations for refrigerant usage. Many occasions the owner denied any policies be put in place because of cost and directed employees to release the refrigerant rather than recover and log any and all usage and reclamation. Many of the employees are not epa certified and are purchasing refrigerant from distributors without regard. The invoices for the purchases and the quantities purchased in the past two years show a willful violation of the policies. No account for the recovery or the amount purchased versus used. There is a blatant disregard for any rules that may impact the company financially, and since the company has been in business, no initiative for epa certification, nor safety in that regard, no logs until a few months ago which are fabricated. It is a very serious concern and potential safety consideration for the employees and the customers. It should be investigated as soon as possible. I have personally witnessed numerous violations and any attempt to rectify the problem was refuted by the owner. Much of the equipment is faulty, no maintenance, the vans have no means of securing refrigerant tanks, a blatant disregard for any rules. Its very disturbing and concerning to say the least, someone will be seriously injured - and the environmental concerns are greatly impacted. The owners name - Scott Campbell. 631 Gettysburg Pike Mechanicsburg PA 17055 717-591-1344

Tip/Complaint:
The reason that I am contacting you is because I have been made aware of a situation that concerns me greatly. I will keep some of the details undisclosed unless you are interested in following this story up. An associate of mine teaches elementary school in a local Maryland school. She teaches in a portable classroom. She told me the other day that she has daily headaches in the afternoon and that almost all of the other teachers who teach in the portables have the same problem. She told me that the teachers have CO2 monitors in the portables but that the principal of the school had instructed the building services staff to turn off the alarms on the monitors because having them going off all afternoon was a distraction to teaching. My source told me that a staff person would take CO2 readings every day at 7am before school even started and that the readings were normal. Duh! No kids in the classroom yet to be creating CO2. Readings observed by the teachers in the afternoon hours were in the 1000 to 1750 ppm range. The teachers have also been instructed NOT to have the fans running all the time bringing fresh air into the portable classrooms. This was because the fans were too noisy. I did a little research into CO2 overexposure and headaches is the first symptom. Death is the last symptom. I feel that the principal is endangering everyone involved in the portable classrooms at her school. This is extremely irresponsible, dangerous and needs to be made public and remedied. There are 12 portable classrooms some of which house up to 30 students. So, somewhere around 250 children and teachers are being put at risk.

Tip/Complaint:

See my prior reports. This morning at 5am the toxic smell was so bad i could smell the odor inside my house. The garage was horrible but when i went outside to get into my car to go to work i had to hold my nose the smell was so nauseating. This must be the decaying of flesh or a sewage spill because the stench is so bad it maded me gag. I have never experienced this type of horrible smell even when i have been on chicken farms, near cattle, or on horse farms. This stench is not normal and if it is associated with mushrooms these mushrooms would not be fit for human consumption. And what type of air quality would the employees have if the smell at my house is several miles away? They must have to wear gas masks.

Tip/Complaint:

I am writing to bring to your attention what I suspect are harmful emissions of carcinogenic, benzene-based aromatic products in this factory. Often the sweet, chemical stench is overwhelming when traveling on I-95. Only occasionally, is it completely absent. On weekends, they dump more than ever possibly trying to fly under the radar screen. I am a physician, and have worked in Philadelphia for twelve years. Our house is in New Jersey, and many mornings the unmistakable smell is in the air even 6 miles in a straight line from the chimneys. The sweet smell may possibly mislead the neighbors of the Port Richmond area, but if it is what I think it is, Honeywell is wise not to have any signs posted anywhere in the factory, because their emissions are highly carcinogenic, and their actions are more than questionable. This is more than a negative externality, it represents a public health. The NJ Department of Environmental Protection has declined any involvement because it is not their jurisdiction, and I am not making any progress in PA, perhaps because I don't have residency there. I would very much appreciate a response about what they are dumping into the atmosphere, and what measures are you taking to make sure they stay within guidelines during and after regular business hours. Thank you!

Tip/Complaint:
 I've noticed this going on for months now It appears the city of Wheeling may be using tri-axle dump trucks to transport sewage sludge to the north fork landfill The issue I have with this is I believe this biohazard should be transported in a SEALED tanker and not an OPEN dump truck The horrible stench fills the air along the route they drive through town and up state rt 2 through Warwood I've had to follow these trucks on numerous occasions and these trucks appear to only have a plastic cover over the bed that does NOTHING to restrain the foul odor and I'm concerned about the health risk to the residents of transporting sludge in an un-sealed vessel should there be a leak

<p>Subject: Regional Tip and/or Complaint - Delaware</p> <p>Recipient: Regional Tip and/or Complaint</p> <p>morris.makeba@epa.gov,connor.garth@epa.gov</p>	<p>HQ Lead Number: FY13-100848-3715-CV Ref. Lead Number: Case Number:</p>	<p>Message Referred To: Region Credible Threat: Priority Term: Language:</p> <p>Lead Status: Assigned Lat: Lon: Category:</p>
<p>Tip/Complaint:</p> <p>Briarwood Mobile Home Park has been out of compliance with state and federal limits with various chemicals, bacteria, etc. for the last 15 years. 1 problem will come into compliance just to either come out of compliance again or come out of compliance with another "problem." The main well is located in a common area away from septic systems. The company installed a cat ion unit about 13 years ago to remove high levels of nitrates from a shallow well but Briarwood changed to a deep well 05/11 because there was radium 226, 228 in the shallow well! Since that time there have been problems with bacteria that has been treated with high levels of chlorine to lower the bacteria levels. Our water sometimes has a swampy smell. The color of the water is charcoal grey most of the time. There is no good water pressure in my home. I must turn on my faucet full force in order to get a decent stream. The Office of Drinking Water is under the Department of Health in Delaware. They have been well aware of the various problems with the water in Briarwood Manor. DENREC has also been notified but they do not take care of water problems. They are aware of the problems with the septic systems (about 3 mobile homes per septic system) in Briarwood Manor. There have been numerous complaints to the Attorney General's office (Investigator Jose Ortiz at the present time). My complaint # is 202691. The problems with the water cause people (not just me or my family) in our park problems with itching, little puss filled bumps (zits) in their hair, agravated psoriasis, and yeast infections. For 15 years I have been "toting" at least 7 gallons of water weekly from my work (about 14 miles away) for drinking and cooking. I feel like I am living in a 3rd world country! The problems are not getting better. In fact, there seems to be a pattern with the problems for myself. My skin starts to itch, then the psoriasis flares up, then I have the zits in my hair and perhaps I have 1 - 1 1/2 weeks out of the month that I have a "normal" life. The water smells, then the cycle starts again. Oh, I forgot to say that the cat ion unit goes through a cycle and puts the water into a drainage ditch at the edge of the common area. There is standing water in the ditch that harbors West African mosquito larvae that an cause West Nile Virus. Unless we have cold enough weather to kill the larvae, we will have the same mosquitos again in the spring! Govenor Jack Markell's office (Jennifer Hill Constituent Relations) as well as the local State Senator Venerables and Representative Timothy Dukes have also been informed of these ongoing problems with the water. We have notified any and all State of Delaware agencies that we can think of but get no where in having an answer to the water problem. The Office of Drinking Water has fined the owners of Briarwood Manor for times the water has been out of compliance - yet the water still is in and out of compliance. Please help the residents of Briarwood Manor. Thanks</p>

Tip/Complaint: I left for work this morning at 5:45am and the horrendous odor made me hold my nose in disgust. It is as though someone is dumping human feces infected with C-Dif which is extremely contagious and infectious. The smell could not be farming odors because i am familiar with the smell of horses, cows, and chickens. This smell was toxic and nauseating. I can't imagine those poor children waiting outside for their school bus having to smell that noxious odor. This smell is not normal and should not be considered a healthy environment for the entire community.
